Company Profile

Zutalé Design is a full service Architectural Lighting Design firm with a diverse background of projects and experience spanning from commercial to transportation, entertainment to hospitality and towers to higher education. Our design and consulting services for Architectural Lighting and Lighting Controls Systems for interior and exterior projects of all shapes and sizes are available to clients throughout the U.S. and international markets.

With a focus on Architectural Lighting Design and backgrounds that includes Interior Design, Architecture, Construction, Graphic Design and Web Development we bring vision, technical analysis and teamwork to the forefront of our work as our commitment to design quality and distinction.

The process of working closely with our clients, architects, designers and construction teams regardless of how near or far the location in order to meet the complex needs of any scale project is one that we thoroughly enjoy. It is through this challenging and interactive design process, that we are able to consistently provide quality service and successful projects for our clients and design team members. We invite you to become a part of this team and look forward to the opportunity to collaborate.

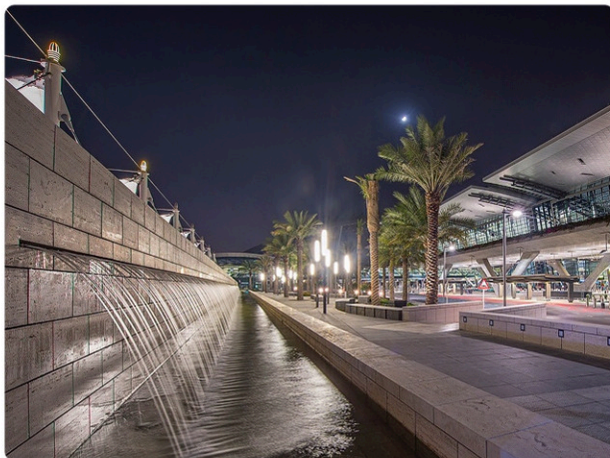

Our team strives to go above and beyond what might be considered part of the typical design process. We welcome the opportunity to work on unique projects and are ready to discuss any creative design challenges that you may have!

Erin Flaum

Partner . Director of Architectural Lighting Design

Erin Flaum is a Partner and Design Director of Architectural Lighting Design at Zutale Design. Ms. Flaum specializes in the creative design and development of Architectural Lighting and Lighting Controls Systems. Her background in Interior Design provided the foundation of her interest to uniquely shape architectural environments through the use of light. Her skills allow her to quickly understand and visualize design concepts while offering adept attention to detail and the ability to work as an integral part of the design team. Beyond creating comfortably inspiring spaces, Ms. Flaum advocates her role as a designer from conceptualization through construction so as to ensure the integrity of a project's design.

Ms. Flaum's career in Architectural Lighting Design has been uniquely focused on complex projects of every scale with a diverse array of architects, designers, clients, construction teams and sites located around the world. From San Francisco to Toronto to Qatar, Ms. Flaum is at home on the ground working in tandem with teams in the local environment as well as coordinating from the home office. Her role goes beyond designer and manager as she delves into every phase of the project from Design to Documentation and Construction. It is her goal to ensure the integrity of the project's design and to see its success both functionally and aesthetically.

Throughout Ms. Flaum's career, she has been involved in many long-term projects allowing her to form a greater understanding of clients' needs and design goals. Her design and management skills have helped her create enduring relationships with many clients and reinforced her strong standing within the design and construction communities. Ms. Flaum continues to employ her design and management skills and strives to build client relationships using the same foundation.

Christopher Ciraulo

Partner . Technical Design Director

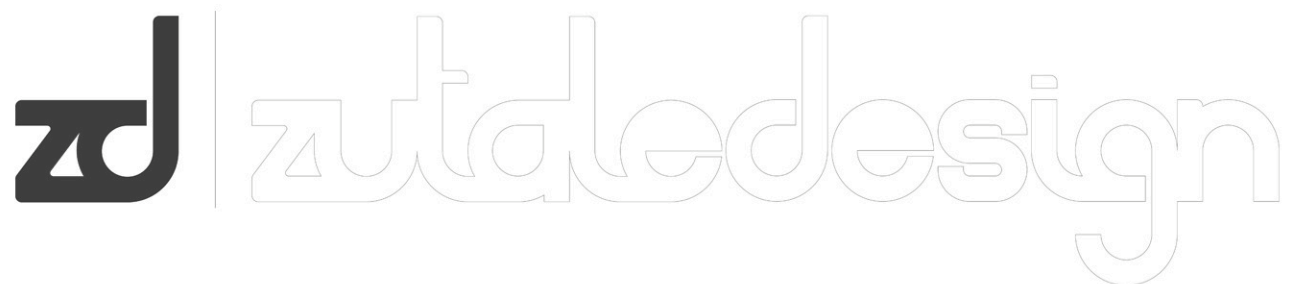

Christopher Ciraulo is a Partner and Technical Design Director for Architectural Lighting Design at Zutalé Design. Mr. Ciraulo specializes in architectural design and technical coordination and brought with him over ten years of design experience from Architectural and Interior Design to Graphic Design and Web Development. His wide range of technical abilities and dedication to his projects and clients have created a solid reputation with architects, designers, consultants, clients and contractors with regards to both domestic and international projects.

Prior to creating Zutalé Design, Mr. Ciraulo was an architectural site representative at Skidmore Owings and Merrill's Chicago Office. Mr. Ciraulo joined the SOM Chicago office in 2005 as an Interior Design Assistant with the Interior Design Studio after graduating from the Massachusetts Institute of Technology's School Of Architecture, with a Master of Architecture degree. After seven years with SOM, including eighteen months spent on-site at the UNC Bell Tower Development in Chapel Hill, North Carolina, he returned to Chicago and joined Studio Gang Architects in 2013. There, he worked with the team on several projects, including the Campus North Residence Hall at the University of Chicago and the 160 Folsom Tower in San Francisco.

Mr. Ciraulo's ability to focus on and visualize the complex architectural detailing required for many of the design concepts being developed at SOM during his time there led him to work with several Interior and Architecture studios on projects ranging from the Peaks Resort and Spa in Telluride, Colorado; the Nanjing Greenland Financial Center in Nanjing, China; the Burj Khalifa in Dubai, UAE; and the UNC Bell Tower Development project in Chapel Hill, North Carolina. He became the technical coordinator on several of these projects and was able to conceptualize design ideas during the Schematic Design phase, present them to the client and eventually give them three-dimensional form within the Construction Documentation and Administration phases.
